

## NovaSpray HFC 245fa

### PERFORMANCES

The **NovaSpray™ HFC 245fa** is an aerosol grade pentafluoropropane. With a constant quality, it meets all the requirements of the aerosol industry.

Its **non-flammability** allows a wide range of formulations requiring safety measures (*regulations, hazardous environments, confined spaces*).

Because of its low **boiling point** it shows **endothermic properties** useful for cooling strained muscles. It is therefore frequently used in this type of formulation.

More economical than other non flammable solvents, it has no effect on the ozone layer and a negligible impact on the greenhouse effect.

### STORAGE AND SHELF LIFE

#### Precautions for handling and storage :

**French plants are controlled by the regulation of listed Establishments and have to comply with it (or with the local legislation).**

- All packaging will be stored in a dry, well ventilated, easily accessible place, sheltered from sunlight and bad weather, away from any ignition source.
- It is recommended to store all packaging either in a specific place or isolated and sheltered by a fence.
- All packaging and piping will be grounded to discharge static electricity.
- Leak detectors, put at ground level, will be connected to an audible alarm, which will trigger in the event of leaks.
- The whole equipment will be tested with an appropriate leak detector before use.
- Material and electrical equipment in an explosive atmosphere will comply with the regulations (*grounding, equipotential bonding, ATEX material*).

**Climalife can study the set up and assembling of your storage tanks, piping, and pumps, according to the prevailing regulations**

**Shelf life: unlimited** (if appropriate storage conditions)
